

DELTA ROE

Website Takeover Guide

deltaroe.com · prepared for Tamika Banks · July 2026 · v1

Everything you need to own and run your website yourself — with an AI assistant named Claude doing all the technical work for you. No coding. No software to install. If you can write a text message, you can run this site.

How this works — the one-minute version

Your website was built so that a person with zero technical background can run it. Here's the whole secret:

1. Your website's "recipe" (all its pages, words, prices, and the Roe chatbot's brain) lives in one place online called **GitHub** — think of it as the master document, with a complete history of every change ever made.
2. A service called **Vercel** reads that recipe and serves the live website to the world, automatically, within about a minute of any change.
3. **Claude** is an AI assistant that reads and edits the recipe *for you*. You tell it what you want in plain English — "raise the sound bath price to \$130" — and it makes the change everywhere it needs to go, shows you, and publishes it. It already knows every rule and detail of your site, because we wrote all of that knowledge into the project itself.

Nothing you or Claude do can permanently break the site. Every change is saved in history and can be undone, and if a change has an error in it, the live site simply stays on the previous version until it's fixed.

This guide has three parts: **A — set up your accounts** (about an hour, one time), **B — transfer day** (Mike hands you the keys), **C — daily life with Claude** (the fun part).

Part A · Set up your three accounts (one time, ~1 hour)

You'll create three free-to-start accounts. Use the same email for all three (we suggest `tamika@deltaroe.com`) and store each password somewhere safe — a password manager or a notebook that stays home. **Never share passwords with anyone — including Claude. It will never ask for one; if anything ever does, stop.**

A1 · GITHUB (WHERE YOUR WEBSITE'S RECIPE LIVES)

1. Go to **github.com** → click **Sign up**.
2. Enter your email, create a password, pick a username (e.g. *tamika-deltaroe*).
3. Verify your email when GitHub sends the confirmation. The free plan is all you need.

A2 · CLAUDE (YOUR AI WEB ASSISTANT)

1. Go to **claude.ai** → **Sign up** with the same email.
2. Subscribe to the **Claude Pro** plan (about \$20/month — this is your "web person" salary now, and it also gives you Claude for everyday business use: writing emails, social posts, flyers, anything).
3. That's it. **There is nothing to install.** Claude works right in your web browser (and the Claude phone app works too).

A3 · VERCEL (THE SERVICE THAT KEEPS THE SITE ONLINE)

1. Go to **vercel.com** → **Sign up** → choose **"Continue with GitHub"** and log in with your new GitHub account. (This links the two — that's the point.)
2. Stop there for now — the website gets connected on transfer day, below.

ACCOUNT	WHAT IT IS	COST
GitHub	The master copy + full history of your website	Free
Claude Pro	Your AI assistant that does all technical work	~\$20/mo
Vercel	Hosting — keeps deltaroe.com online worldwide	Free to start; Pro \$20/mo for a business site

Part B · Transfer day — Mike hands you the keys

Do this together on a call or in person; it takes about 30–45 minutes total.

	STEP	WHO	WHAT HAPPENS
☐	1. GitHub transfer. Mike opens the website project on GitHub → Settings → "Transfer ownership" → types your GitHub username.	Mike	You get an email from GitHub — click Accept within 24 hours . The master copy is now legally in your account.
☐	2. Connect Vercel. In your Vercel account: Add New... → Project → pick <i>deltaroe-website</i> from your GitHub list → Import → Deploy (don't change any settings).	You (Mike guiding)	Vercel builds your own copy of the live site and gives it a web address. From now on, every published change goes live automatically.
☐	3. Intake-form email. Create a free account at resend.com , then ask Claude (Part C) to walk you both through connecting it, so New Client intake forms arrive at Info@deltaroe.com from your own domain.	You + Claude	Until this is done the intake form still sends through Mike's interim sender — it works, but finish this step soon after transfer.
☐	4. Point deltaroe.com at the new site. This is the "grand opening" switch — see the Launch Checklist (Part E). It can happen the same day or later, whenever you're ready to say goodbye to the old Wix site.	You + Claude + Mike	deltaroe.com starts showing the new site. Then cancel Wix. 🗡️
☐	5. Housekeeping. Mike removes his own access; you add him back only if you ever want help.	Mike	You now own 100% of the website.

Already yours and unchanged by the transfer: the deltaroe.com domain, your email, Square, and (later) Shopify, Google Business Profile, and Google Analytics — those were always going to be in your name.

Part C · Daily life with Claude — your new web person

C1 · OPENING THE WORKSHOP

1. Go to **claude.ai/code** in your browser (bookmark it).
2. First visit only: it will ask to connect to GitHub — click **Install the Claude GitHub App** and approve. This is how Claude reaches your website's recipe. If it shows an environment confirmation screen, accept the default.
3. In the repository picker, choose **deltaroe-website**.
4. Type what you want, in plain English, and press Enter. That's the whole job.

C2 · HOW A CHANGE GOES LIVE (WHAT YOU'LL SEE)

1. You describe the change. Claude edits the recipe in a safe workspace in the cloud and shows you what it changed.
2. You click **Create PR** (a "pull request" — think: *a change slip waiting for the owner's signature*).
3. On the GitHub page that opens, click **Merge**. That's your signature. Vercel notices, rebuilds, and the change is live in about a minute.
4. Not sure about a change? Just don't merge it — the live site is untouched. Merged something you regret? Tell Claude "undo my last change" and it will.

C3 · YOUR SHORTCUT MENU

Type / in the message box and ready-made routines we built for you appear:

TYPE THIS	WHAT IT DOES
/change-a-price	Changes a price everywhere it appears on the site (and reminds you to match it in Square)
/teach-roe	Teaches your chat bubble a new question & answer, in your voice
/update-hours	Updates hours / phone / address across the whole site
/add-event	Adds a workshop, Sound of Paint night, or group sound bath to the Events page
/new-journal-post	Writes a journal article with you (great for showing up on Google)
/publish	Publishes pending work and double-checks it live
/site-checkup	Monthly health check of the whole site — run it the first of each month

C4 · THE COOKBOOK — THINGS TO SAY TO CLAUDE, WORD FOR WORD

🗨 COPY & PASTE THIS TO CLAUDE:

Raise the Sound Bath Immersion price to \$130 everywhere it appears, and remind me what to change in Square.

🗨 COPY & PASTE THIS TO CLAUDE:

A client asked Roe whether sound baths are safe during pregnancy and she didn't have a good answer. Teach her this: [type the answer the way you'd say it].

🗨 COPY & PASTE THIS TO CLAUDE:

Add an event: Sound of Paint, Friday August 21 at 6:30pm, \$55, at the studio. Painting + guided sound journey, all supplies included.

🗨 COPY & PASTE THIS TO CLAUDE:

We're closed the week of Thanksgiving — put a gentle notice on the homepage and take it down after.

🗨 COPY & PASTE THIS TO CLAUDE:

Write a journal post about how sound baths help with sleep. Show me the draft before publishing.

🗨 COPY & PASTE THIS TO CLAUDE:

Change my Friday hours to 1pm–5pm everywhere.

🗨 COPY & PASTE THIS TO CLAUDE:

Something looks wrong on the phone version of the services page — here's a screenshot. Please fix it.

🗨 COPY & PASTE THIS TO CLAUDE:

Undo the last change we made.

🗨 COPY & PASTE THIS TO CLAUDE:

Run a full site checkup and tell me in plain language what needs attention.

🗨 COPY & PASTE THIS TO CLAUDE:

What questions has Roe been unable to answer lately? Let's teach her the top three.

Claude already knows all the rules of your site — your brand colors, your voice, that prices must update in seven places at once, that imagery must be right, that wellness language stays honest. You never need to remember any of that; it's written into the project and Claude reads it every time.

C5 • GOOD TO KNOW

- **Usage limits:** Claude Pro allows a generous number of messages per 5-hour window. If you ever hit it, it just asks you to come back in a few hours — nothing is lost. For a few website tweaks a week you will rarely notice.
- **Phone:** the Claude app on your phone can do all of this too.
- **Closing the tab is fine** — Claude keeps working in the cloud and the session is right there when you come back.

Part D · The rules your website lives by

These are already built into the project (Claude enforces them) — listed here so you know your own house rules:

- **Imagery:** no stock photos of faces, ever — nothing that misrepresents you. Hands-only stock is fine. The best future upgrade is a real photo shoot of you in the studio.
- **Voice:** warm, direct, empowering — your voice. Visitors are addressed gender-neutrally ("friend"), because your clients include men. Your book titles (*FLY Queen*) always stay as titles.
- **Colors:** midnight black + antique gold + champagne. Chakra colors appear only where they mean something (the chakra page, The Clearing, Sound of Paint).
- **Honesty:** everything is "complementary wellness," never a substitute for medical care. No medical claims, ever.
- **Prices update everywhere at once** — pages, FAQ, Roe, and the summary that AI search engines read. Claude handles this automatically.
- **Roe can never go rogue:** she only says what's been written for her, and she costs \$0 to run.

Part E · Launch checklist (from Wix to your new site)

In order, whenever you're ready — ask Claude to help with every step:

1. **Square Appointments:** set up your services, prices, deposits, gift cards, and memberships in Square (Mike's Owner's Manual §2 covers daily use). Then tell Claude: *"Square is ready — switch all the Book buttons from Wix to my Square booking page: [paste your Square booking link]."*
2. **Save anything you love from the old Wix site** — it disappears at cutover. (Ask Claude to help capture it.)
3. **Point deltaroe.com at Vercel:** in Vercel → your project → Settings → Domains → add deltaroe.com; it shows you exactly what to change where your domain is managed. Claude can walk you through it click by click.
4. **Google:** update your Google Business Profile website link; finish GBP verification; click "Ask for reviews" there and give Claude the review link — it wires up the site's review funnel. Ask Claude to set up Google Analytics + Search Console (both free).
5. **Cancel Wix.** 🧨

Part F · The Apothecary shop (when you're ready — separate project)

The shop page is currently a preview. The plan, fully researched: a Shopify store (~\$29–39/mo) where suppliers make and ship everything under the Delta Roe label — you never touch inventory. Chosen suppliers: **Candle Builders** (candles), **Blanka** (body & massage oils), **Enchanted Soul** (crystals, sage, ritual kits), **Printful** (apparel). First step when ready: order samples (1–3 weeks), approve what you love, then open in ~4–6 weeks. Claude knows the whole plan — just say *"let's start the Apothecary."*

Part G · Money, safety, and when to call for help

MONTHLY COST	AMOUNT
Claude Pro (your web assistant)	~\$20

Vercel hosting	\$20 (Pro)
deltaroe.com domain	~\$15–20/yr (already yours)
Square / Google tools	Free (+card fees on sales)
Shopify — only when the shop opens	~\$29–39
Total at takeover	~ \$40/mo (~\$70–80 once the shop opens)

- **Passwords:** never share them — not with Claude, not with anyone who emails or calls claiming to "help with the website."
- **Every change is reversible.** "Undo the last change" always works.
- **If the site ever looks broken:** don't panic — tell Claude, with a screenshot if you can. It can also roll the site back to any earlier version.
- **First of the month:** type **/site-checkup**. Two minutes of reading keeps everything healthy.
- **Mike remains a phone call away** for anything weird — but the goal of this packet is that you won't need it.

Delta Roe Website Takeover Guide v1 · July 2026 · Companion documents in the same folder: Owner's Manual v1 (day-to-day Square/Shopify), GBP kit, review card & reply templates. The technical knowledge base Claude reads lives in the project as CLAUDE.md.
